

WHAT IS CREATIVE COMMONS AND WHY DO PEOPLE USE ITS LICENCES?

Creative Commons is a non-profit organisation that helps people share their copyright works for reuse by others. Sometimes creators and other copyright holders want the public to be able to reuse their works but are unable to allow reuse easily and legally given the works' "All Rights Reserved" copyright status. Creative Commons licences enable copyright holders to allow reuse of their works by giving everyone a range of permissions in advance.

You can choose the kinds of permissions to grant over your work and let people know with a clear yet robust licence. Individuals, institutions, artists, scientists and public agencies around the world are now declaring "Some Rights Reserved" with Creative Commons licences.

People who use Creative Commons licences are contributing to a global pool of reusable original works. Everyone is able to reuse those works, leading to a culture of sharing and fostering new ideas and opportunities.
